SUMMARY

Computer Science undergraduate at MNNIT Allahabad with strong foundations in **Data Structures and Algorithms**, **Backend Development**, and **System Design**. Solved **500+ DSA problems**, achieved **LeetCode Rating 1786**, and built scalable web applications. Interested in backend engineering and AI-powered applications.

EDUCATION

- **Motilal Nehru National Institute of Technology Allahabad, Prayagraj** 2023–2027
Bachelor of Technology in Computer Science and Engineering CPI: 8.03
- **St. John's School, Chandauli** 2021–2022
Intermediate, Council for the Indian School Certificate Examinations (CISCE) Percentage: 97
- **St. John's School, Chandauli** 2019–2020
High School, Council for the Indian School Certificate Examinations (CISCE) Percentage: 92.8

TECHNICAL SKILLS

Languages: JavaScript, Python, C++, SQL

Frontend: React, Next.js, HTML, CSS

Backend: Node.js, Express.js, REST APIs, FastAPI, Authentication, API Design

Databases: PostgreSQL, SQLite, Prisma ORM

Concepts: Data Structures, Algorithms, OOP, DBMS, Operating Systems, Computer Networks, System Design

Tools: Git, GitHub

PERSONAL PROJECTS

- **AI-powered Placement Email Event Tracking System**   March 2026 – Ongoing
 - Developed an **AI-powered placement tracking system** that extracts hiring events from placement emails and stores structured records in PostgreSQL.
 - Built backend services using **Node.js**, **Express.js**, and **Prisma ORM** for event processing and retrieval.
 - Designed email parsing and data-cleaning pipelines to remove duplicates and improve data quality.
 - Optimized PostgreSQL queries and indexing strategies for faster event search and retrieval.
- **FaceID-Tracker – Real-time Face Recognition System**  March 2025 – April 2025
 - Developed a **real-time face identification system** using **Siamese Neural Networks** and **facial embeddings** for similarity-based identity verification.
 - Built an end-to-end inference pipeline comprising **face detection**, **face segmentation**, feature extraction, and confidence-based prediction.
 - Developed **FastAPI model-serving APIs** and integrated them with a **React frontend** for live camera-based face registration and identification.
 - Designed an **embedding matching system** with **confidence thresholding** to improve recognition reliability and reduce false positives.
- **CodeSync | Real-time Collaborative Interview Platform**   May 2025 – Jun 2025
 - Built a **real-time collaborative coding platform** supporting multiple users in shared interview rooms using **Convex** and **React**.
 - Implemented **live code synchronization** and session management, ensuring low-latency updates across connected clients.
 - Integrated **Clerk Authentication** for secure user login and protected interview sessions.
 - Optimized state synchronization logic, reducing inconsistent updates during concurrent editing.

ACHIEVEMENTS

- **LeetCode Rating: 1786 (Top 8%)**
- **Global Rank 2,261/35,588** in LeetCode Biweekly Contest
- **500+ DSA problems** solved across coding platforms
- Strong foundation in **Data Structures, Algorithms, and Competitive Programming**
